- Developed a framework for content creation and organized various project requirements.
- Conducted research correlating aviation and palm oil to propose an innovative solution called **Palm Aero Fuel**.
- Achieved **Top 80** in the competition, showcasing innovative energy solutions.

Technical Project

Fullstech Agency

February, 2025 – Now

Founder | Frontend Developer

- Built responsive and interactive frontend interfaces for company profile websites using Laravel 12 and Blade templating.
- Focused on frontend layouting, component reuse, and clean UI structure using Laravel's view system.
- Styled pages with modern CSS frameworks (Tailwind CSS) to ensure mobile-first and user-friendly design.
- Collaborated with backend developers to integrate dynamic data into Blade views and ensure smooth user interaction across the site.
- Handled route-based view rendering and ensured frontend consistency throughout the site using layout inheritance and partials.

Gaboothz: Online Gallery Photobooth

February, 2025 – Now

College Project | Fullstack Developer

- Developed the user interface using **React TypeScript** in a **Vite** environment for fast iteration and optimized performance. For the Backend, using Laravel for faster development and implement Controller Logic.
- Styled the entire UI using **Tailwind CSS**, enabling a utility-first, responsive design system that streamlined the development process.
- Implemented accessible and consistent design components using **ShadCN UI**, ensuring design scalability and reusability.
- Designed and maintained a **modular folder structure** to improve code organization, scalability, and team collaboration.
- Creating an engaging Dashboard, to visualize data based on user, income, subscription, template and effects usage.

STYLO AI – Web 3.0 Fashion Recommendation

March, 2025 – April 2025

CodeFest ICP Web 3.0 Competition | Frontend Developer, UI/UX Designer

- Built the frontend of a decentralized fashion recommendation system using **React**, emphasizing responsive design and intuitive user experience.
- Integrated with a Rust-based Large Language Model (LLM) hosted on the Internet Computer Protocol (ICP) for real-time AI-driven fashion chat suggestions.

Lost&Found App

July, 2025 – Now

Group Project | Fullstack Developer

- Developed responsive landing pages and user interfaces using **React TypeScript** in a **Vite** environment, ensuring an intuitive user experience for reporting and locating lost items.

- Styled the entire UI using **Tailwind CSS**, enabling a utility-first, responsive design system that streamlined the development process.
- Developed the backend using **Laravel** for rapid development and efficient controller logic implementation. Designed and implemented authentication forms (login and registration) with strong client-side validation, including password matching verification.
- Integrated form data with the defined API schema, managing user information such as name, email, username, password, city, and province.
- Implemented accessible and consistent design components using ShadCN UI, ensuring design scalability and reusability.

Maintaining Extension SPOT UPI 2.0

August, 2024

KTG Community Project | Frontend Developer

- Developed and maintained the SPOT UPI 2.0 browser extension using **JavaScript**, focusing on enhancing user experience and functionality.
- Implemented **data fetching** mechanisms to retrieve and display real-time information from the SPOT UPI platform.
- Optimized existing features and introduced new functionalities, such as a **task-checking system** to identify and notify users of incomplete or pending tasks.
- Improved performance and responsiveness of the extension through code refactoring and optimization techniques.
- Collaborated with stakeholders to ensure the extension aligns with user needs and platform updates.

Redesign MyPertamina Mobile Apps

June, 2024 – July, 2024

Marketeers Competition | UI/UX Designer & Researcher

- Redesigned the MyPertamina mobile application to enhance user experience and improve interface intuitiveness.
- Developed wireframes, prototypes, and high-fidelity UI designs to create a modern and seamless design.
- Conducted user research and usability testing to identify pain points and implement effective design solutions.
- Worked collaboratively with developers and stakeholders to ensure design consistency with MyPertamina's branding and business goals.
- Focused on optimizing navigation, accessibility, and visual hierarchy to improve overall app usability.

Designing IlmuPadi Mobile Apps

March, 2024 – December, 2024

College Projects | UI/UX Designer & Researcher

- Conceptualized and designed the mobile application for IlmuPadi, focusing on enhancing user experience and intuitive navigation.
- Developed wireframes, prototypes, and visual assets to create a seamless and engaging interface.
- Collaborated with stakeholders to ensure the design aligned with the application's educational goals and branding.

Designing Kitab Si Shu Mobile Apps

September, 2024 – January, 2025

College Projects | UI/UX Designer & Researcher

- Designed and developed the Kitab Si Shu mobile application, focusing on an interactive and user-friendly experience.
- Created wireframes, prototypes, and visual assets to ensure a seamless and engaging interface.
- Worked closely with developers and stakeholders to align the design with educational objectives and brand identity.
- Conducted **usability testing** and gathered user feedback to refine and enhance the app's functionality and design.
- Implemented accessibility features to improve inclusivity and user engagement.

Designing and Developing Komikan

January, 2025 – Now

Self Projects | Frontend Developer, UI/UX Designer

- Designed and developed the Komikan website, focusing on a visually appealing and user-friendly comic reading experience.
- Created wireframes, prototypes, and UI components to ensure an intuitive and engaging interface.
- Implemented responsive design principles to optimize the website for various screen sizes and devices.
- Conducted usability testing and gathered feedback to refine navigation, layout, and overall user experience.
- Collaborated with developers and stakeholders to align the design with the website's branding and functionality goals.

Developing the Backend of UPI Food Ordering Application

September, 2023 – January, 2024

College Projects

- Designed and developed the core logic for the UPI Food ordering system using **Python**, ensuring smooth order processing and management.
- Implemented key features such as menu selection, order tracking, and payment calculation.
- Developed a structured workflow to handle customer orders from placement to completion.
- Ensured a user-friendly experience by optimizing system logic for quick and accurate responses.
- Collaborated with stakeholders to align the application's functionality with business needs and customer expectations.

Developing the Back-End for Hospital Queue Management System

February, 2024 – May, 2024

College Projects

- Developed the core logic using **C++** for the hospital queue management system using **Queue algorithm** to streamline patient registration and appointment scheduling.
- Implemented key features such as real-time queue tracking, patient categorization, and estimated waiting time calculation.
- Developed a structured workflow to manage patient check-ins, doctor assignments, and service order processing.

Skills & Interests

Programming Languages:

- Python (Intermediate), C++ (Intermediate), JavaScript (Intermediate), HTML, CSS, PHP (Intermediate),

Framework & Libraries:

- Laravel (Intermediate), React.JS (Intermediate), Vue.JS (Intermediate), Bootstrap and Tailwind CSS (Intermediate), jQuery

Tools & Platforms:

- Git, Figma, Microsoft Excel, Google Sheets, Canva, VS Code

Business & Analytical Skills:

- Strategic Planning, Business Model Canvas, Data Analysis (Excel), Negotiation, Conflict Resolution

Soft Skills:

- Leadership, Teamwork, Public Speaking, Problem Solving, Coaching

Languages:

- English (Intermediate)

Interests:

- Entrepreneurship: Interested in developing innovative business ideas and exploring new market opportunities.
- Leadership: Dedicated to enhancing leadership skills and inspiring teams to achieve collective goals.
- Web 3.0: Interested in developing decentralization internet ecosystem
- Tech & Product Development: Curious about the intersection of technology and business, particularly in developing impactful digital products.
